Serenity™ Audit and Recall

*Are you tracking surgical instrument trays from patients? Are you compliant with AAMI and CDC standards?*

Serenity users can immediately audit and recall processed items, create reports and track items from patients. Serenity provides immediate standardization and compliance capabilities throughout your department and organization. Real time views of sterilization records and tray activity from single departments to multiple facilities are instantly available via administratively driven secure user names and passwords.

Additional Reports Available

Serenity is a simple electronic solution designed to replace sterilization date label and manual record keeping systems.

Serenity's patent pending electronic audit and recall solution provides the ability to track trays, peel packs and other facility-sterilized medical devices from the patient. **Start tracking today.**

Benefits

Increased Efficiencies
- Eliminate handwriting
- Eliminate logbooks
- Eliminate paper records
- Eliminate costly storage
- Eliminate written errors

Ease of Use
- No installation
- Web based
- Minimal training
- Immediate recall to batch load and audit
- Instant reporting
- Tray count tracking

Additional Feature
SurgiDat Serenity provides the ability to trace each facility-sterilized medical device from the patient on whom it was used. Start towards epidemiological tracking today.

Sterilization Load Verification Report

STATUS: Completed   PRESSURE: 134.2   STATUS

Item	Name	Pass/Fail
0SD11732G	Lap Chole Tray	Passed
0SD117321	Lap Nissen Tray	Failed
0SD117322	Hand Tray	Passed
0SD117323	MioCardiac Tray	Passed

"
I need an electronic audit, recall and tray tracking solution. We are not complying with AAMI and CDC standards and we have no capital.
"

Serenity Advantage

Serenity provides immediate audit, recall and tray tracking information and other valuable applications all without capital. There is little to no change in work flow allowing almost overnight implementation of Serenity.

"
I am having problems with tray maintenance and physician satisfaction. I need the ability to count the number of times a tray has been processed to better coordinate maintenance with our team leaders and instrument repair van.
"

Serenity Advantage

Serenity provides a tray count solution by department. You can pull reports showing how many times trays or individually packed instruments have been reprocessed. This ability will provide better coordination of instrument maintenance between you and your repair vendor and increase physician satisfaction.

"
I need to be prepared for JCAHO audits. It is my understanding JCAHO is consistently auditing sterilization records and they are starting to request flash sterilization information.
"

Serenity Advantage

Serenity provides standardization and compliance capabilities throughout your department and organization. Serenity is an excellent solution for AAMI and CDC requirements and successfully passing JCAHO audits.

Integrity and Accountability Through Innovation
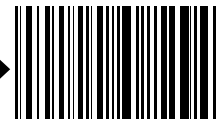

Breakthrough technology

- *No capital investment*
- *No installation*
- *Automates manual workflow*
- *Tray tracking*
